

**TECHNICAL DATA SHEET****Retinoic acid PEG FITC, MW 1k, 2k, 3400, 5k, 10k, 20k**

Catalog Numbers: PG2-FCVA-1k, 2k, 3k, 5k, 10k, 20k.

Synonym: FITC PEG Retinoic acid, Fluorescein PEG Retinoic acid

**Description:**

**Retinoic acid PEG FITC** offered by Nanocs is a bioactive fluorescent PEG derivative that emits green fluorescent light upon excited around 495 nm. Retinoic acid is a metabolite of Vitamin A that mediates the functions of vitamin A required for growth and development. Retinoic acid is an essential molecule that required for the early to late development of animals or humans. Retinoic acid is a fat-soluble vitamin A derivative with high hydrophobicity. Polyethylene glycol modification imparts good water solubility to modified retinoic acid. Meanwhile, FITC is a bright green fluorescent dye that has excitation/emission wavelength at 495 nm/515 nm.

**Product Structure:****Product Specifications:**

- Composition: **Retinoic acid PEG FITC.**
- Appearance: Yellow to orange solid or semi-solid depends on molecular weight.
- Solubility: Soluble in water, chloroform, DMSO, DMF, etc.
- Stability: >6 months at -20 °C.

**Handling and Use:**

For best use, **Retinoic acid PEG FITC** should always be kept in low temperature in dry condition. Prepare fresh solution right before use. Avoid frequent thaw and freezing. For more information about using this product, visit [www.nanocs.net](http://www.nanocs.net).

**Storage Conditions:**

**FITC PEG Retinoic acid** should be stored at -20 °C. Desiccate. Protect from light. Re-test material after 6 months.

**This product is for research use only and is not intended for use in humans or for diagnostic use.**
